

## Contents of Box:

- 1- Router
- 1- Power Supply
- 2-2.5G/5.8G Antennas
- 4-4G/5G Antennas

*For best results please use only the items provided with the router.*

### Step 1:

**Connect both 2.5G/5.8G antennas, to the sides of the router. Connect all 4G/5G antennas to the back of the back of the router.**

*Always use all antennas provided.*

### Step 2:

**Power on the device by inserting the connector into the power input as illustrated.**

*Place the device near a window to receive the best signal strength. Signal strength will increase over time.*

### Step 3:

**Once the device is powered on please call Emergence Internet Customer Support at 855-888-8772 to activate your service.**

*Please do not unplug the device while Customer Support provisions your internet service.*

### Step 4:

**Emergence Internet Customer Support will notify you when your services have been provisioned.**

### Step 5:

**Connect to Wi-Fi**

**Wi-Fi Name: Emergence 2.4G / Emergence 5G  
Password (for both 2.4G and 5G):12345678**

*Please change this password for your Wi-Fi security*

*To change your password connect to the router. Input the IP address (found on the bottom of the router) in your browsers search bar. Log in using the username and password provided on the router. On the left hand side select system, and password. Input your new password, confirm your password and select save.*
